

Contained within a neat waterproof zippered bag, our Mistral WindSUP® rig is the ideal companion for our WindSUP® Crossover inflatable boards or as a conversion for some of our hardboards which accomodate a windsurfing rig. Better still, some of our boards will accomodate the rig-bag within the cargo net. Paddle to your destination and if the wind is favourable, sail back home.

(See also our WindSUP® blog pages)

Within the bag

2 piece aluminium boom and outhaul

5 piece fibreglass mast

uphaul (attaches to the boom to raise the sail from the water)

mastfoot with urethane universal joint

mast extension and downhaul

sail of your choice of 3.0m (jnr size), 4.5m or 5.3m

Bag fits deck of some of our boards. Neat spray-proof zippered bag with all you need. Connect 5 piece mast.

Slide sail onto mast through the mast sleeve.

Fat head sail with single batten. Feed uphaul tie-off into uphaul hole, knot so as to secure in place.

Approximate boom position within mast sleeve gap, relative to your height (shoulder). Slot in mast extension.

Feed downhaul back and forth between clew and rollers, tension, fasten off in cleat. Pass elastic loop-end over extension.

Feed outhaul through clew, pull to secure. Secure mast base using rubber supplied. Mast foot screws into recessed brass nut.

Push fit extension into receiving end. It will 'click' into place. To remove, press silver button on extension.
